BUILT SHARPER™

ACCEPT NO SUBSTITUTES

Sure, at first glance, using a will-fitter part may seem like an option. It might even appear to save you money in the short run (emphasis on short).

Before you settle on an imitation, know this — Alamo Industrial® Replacement Parts offer the safety, durability and warranty protection you expect. You have made an investment in your equipment, now invest in its future. Avoid buying imitations and insist on the original.

GENUINELY BETTER

- Our OEM replacement parts are specifically designed for peak performance of your Alamo Industrial mowing and trimming equipment. We design and build to exact specifications requiring strict chemical strength and performance characteristics. Imitation parts may not function properly because they are reversed engineered.

- Alamo Industrial replacement parts meet the rigid guidelines necessary to satisfy warranty requirements. Using anything less means you aren't maintaining the structural, operational, and safety integrity of your equipment. It is the owner's responsibility to ensure the equipment is maintained in compliance with these safety standards. All warranties are void unless only genuine OEM parts are used, which means additional out of pocket expense and liability on your behalf.

- Alamo Industrial parts experts are available to answer any questions you have. Unlike imitators, they possess the knowledge of and have first-hand experience with our complete line of equipment.

- Alamo Industrial parts are tested to meet SAE and ASAE safety standards. We take pride in manufacturing quality parts that consistently test above and beyond the industry standards.
